Dear Andrea:

I am sorry it has taken so long to write and tell you how much I appreciated the help and support provided by both you and your employees. I am feeling much better now and getting back in to the " swing of things."

The fact that the girls arrived at my home knowing my medical problem, about the recent death of my husband, and generally what was expected of them made it so very easy for both myself and my daughter, Fern Glass. Their kindness, support and nursing was just what I needed those first days after my return from the hospital. Your follow up call was the icing on the cake.

Thank you for your quick response to my needs and I wish you all the best.

Sincerely,

Marcia Fromstein
